

Introducing Sun-Shades from

Sure we can see the irony in spending 20 years creating rooms filled with sunshine and then creating a product intended to block the sun. But when we found out that sunroom owners enjoy spending a great deal of time in their sunrooms and sometimes they want the comfort of shade too, we created the solution.

Sun-Shades are custom designed for Sunrooms and Porch Enclosures!

When ordered with a new sunroom, no additional measurements are needed. The shades will be delivered with your sunroom and correctly installed by professionals who know how to properly install your shades.

Sun-Shades provide excellent protection from the sun while preserving your view!

Available with an openness factor of 3%, 5% or 14% and with 6 fabric colors to choose from, Sun-Shades are simple, effective, and economical. They are not only private, but easy to use as they raise and lower in one smooth, easy motion. Often referred to as "sunglasses" for your windows, their ability to cut the glare makes them ideal for media rooms, studies, or any sun-facing room where sun control is desired.

Sun-Shades protect from the sun in 4 ways:

- **Protect furniture from damaging Ultra Violet (UV) rays**
- **Reduce glare**
- **Diffuse light**
- **Help control heat gain**

Available Colors

- Chalk
- Alabaster
- Pebblestone
- Tobacco
- Ebony
- Greystone
